4	<u>Dakota Adventures Trail</u>	<p>On 25 July 2014, Singapore's Housing Development Board announced that the Dakota Crescent estate was slated for redevelopment. By December 2016, residents have moved out of this place they used to call 'home'. Consisting of a majority ageing population, some struggle with small things like taking the lift, remembering their way home, and making friends with new neighbours. Others struggle with bigger issues like keeping their house clean, getting regular meals and staying healthy.</p> <p>The relocation of an entire estate calls into question Singaporean's idea of home. What are the impacts of demolishing a site relatable to the population? Do people make the place, or does the place make the people?</p> <p>With these questions, the tour hopes to open the discussion about how we care for different populations, activation of the community, and what a ground-up response can look like. It consists of a walk in the estate of Dakota Crescent, following the story of relocation to Cassia Crescent with a stop at Old Airport Hawker Centre in between. In addition, participants will get to understand the efforts of ground up initiatives through Cassia Resettlement Team as well as possibly visit residents who have relocated to the new estate.</p>	15

This not only restores their joy in playing, but also helps them learn about the concept of cause and effect, and encourages the development of motor skills.</p>	24
