

STRENGTHENING CAPABILITIES FOR INTEGRATED CARE IN A “SUPER-AGED” SOCIETY

30th October 2023

TECH-ENABLED ELDERCARE: ENHANCING COMMUNITY CARE AND EMPOWERING LIVES

PRESENTED BY

MS JUSTINA TEO

ASSISTANT DIRECTOR,
SPECIAL PROJECTS & DEVELOPMENT

Enhancing Community Care through Technology

Technological Innovation as Enablers in Healthy Ageing

Digital health technologies have become a critical enabler for meeting the challenges of aging, with the potential to increase access, expand service coverage, improve the quality of service delivery, reduce health disparities, and lower healthcare cost (Duke-NUS Centre of Regulatory Excellence, 2020).

Digital Innovations & Enhancements in **SCREENING & MONITORING** of Seniors' health

Considerations of our Technology Adoption are:

- Convenience
- Non-intrusive
- Sustainability
- Ability to scale & integrate

Empowering Seniors through Technology

Impact of Technology on Seniors' Health & Health-Seeking Behavior

Enhancing Community Care through Technology

LB's Digital Transformation Strategy

Preventive & Early-stage Intervention Eldercare

Virtual Befriending

Exposing seniors to digital content & engagement.

Smartphone Deployment

Equipping seniors with tools to access digital content.

Telemedicine & Teleconsultation

Helping seniors seek medical help more safely and efficiently.

AI (Screening)

Screening of seniors' negative emotions & mental health.

IM-OK System (Monitoring)

Empowering seniors to take ownership of their own well-being.

IM-HEALTHY Station (Monitoring)

Promote easy monitoring & quick detection of change in health statuses.

Ongoing Development

Improving current pilots & finding areas to innovate.

Outcomes

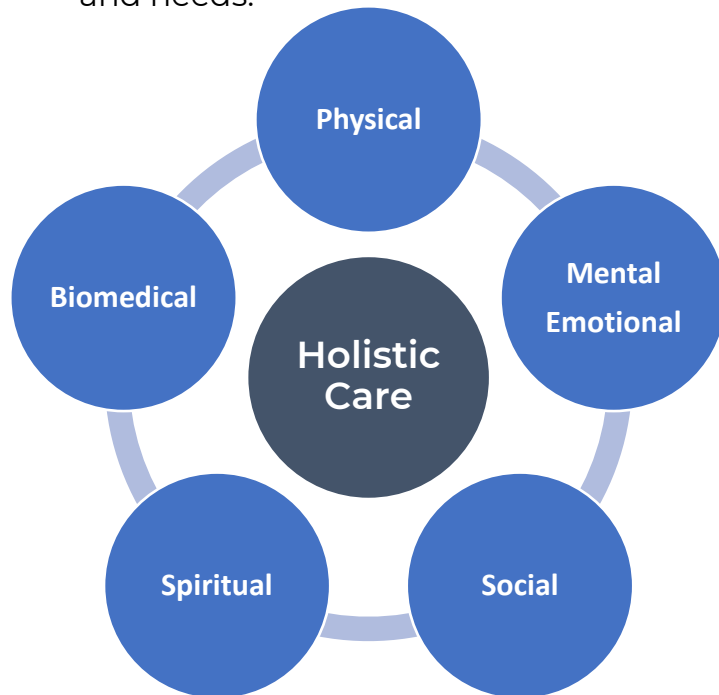

- 1 Strengthen LB's Capability in Community Care
- 2 Change in Seniors' Perception of Technology & Promotes Health-Seeking Behaviour

Enhancing the Quality of Community Care

LB's Approach

HOLISTIC

LB strives to provide holistic care for seniors. Our TechCare focuses on various aspects of an individual's health and needs.

ACCESSIBLE

LB ensures that our TechCare can be easily accessed and navigated by seniors to lower the barrier to health management.

Our goal is to help seniors familiarize with the TechCare so that they can take ownership of their health.

IM-OK System

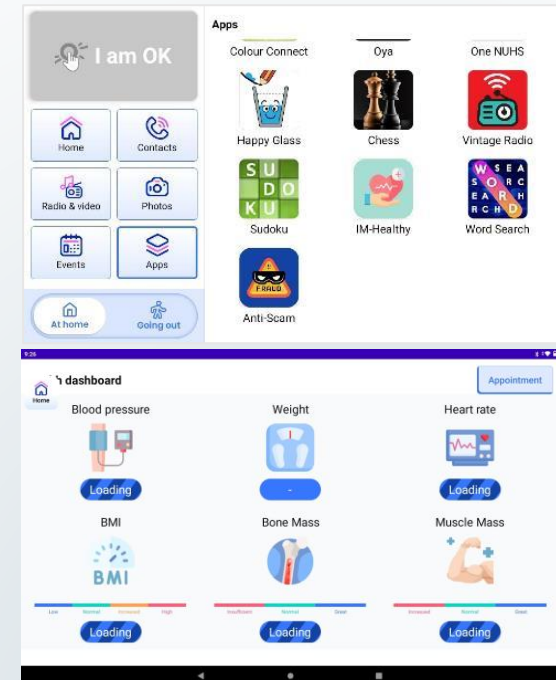

IM-HEALTHY Station

SCALABLE

Scalability of LB's TechCare to accommodate future growth and evolving healthcare needs.

IM-OK
Ecosystem
Version 4

Enhancing the Quality of Community Care

LB's Approach

EMPOWERING

LB seeks to gain insights to **seniors' experience and attitudes** towards adopting technology to elevate their technological experience.

Project Cognitivity

- In addition to the pilot study and analysis, LB went a step further and administered a survey to 209 senior participants to understand what they value and deem important when it comes to doing a dementia screening.
- Questions include: "Do you think the challenges of using CognICA assessments can be overcome?", "What would improve your experience when using CognICA assessments or increase your willingness to adopt it in the future?"
- The feedback gathered from this survey enables LB to improve our services and more importantly, understand the factors that promote or impede seniors' adoption of technology.

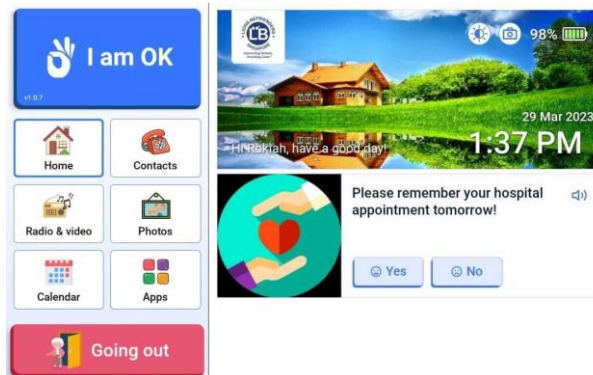

Enhancing Community Care through Technology

Strengthening LB's Capabilities through Technology

Technology **streamlines operations, optimizes manpower and resource allocation**

IM-OK System

- Wellness Device for Self-Monitoring & Reporting of Wellbeing.
- The utilization of IM-OK enables LB staff to focus on other areas of work. Caregivers and healthcare providers can access real-time data and provide timely assistance when necessary.

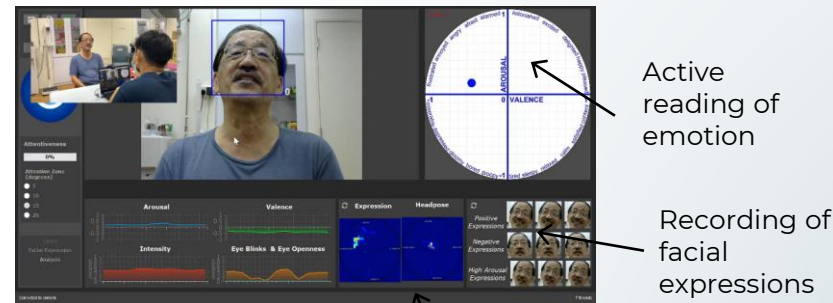

Intensity of emotions and measurement of eye movements

Technology **advances preventive care** – AI-Enhanced Screening & Diagnostic Tools

AI-powered tools can assist in more accurate and timely disease screening and diagnosis, potentially detecting health issues at earlier, more treatable stages.

F.A.C.E AI

- Speeds up screening of depression, it sieves out seniors with negative results for further intervention.
- Technology shortens the time needed to screen for depression from 40 minutes to 10 minutes.

Active reading of emotion

Recording of facial expressions

Heatmap of emotions and head pose

Technology **empowers seniors to age in place confidently**

IM HEALTHY Station

- Offers seniors community-based vital signs monitoring for more regular self-monitoring of health at accessible locations.
- As seniors explore and use IM HEALTHY Station more, it reduces their fear of vital signs monitoring.

THANK YOU!
