

**Work Attachment Learning Objectives  
for Supply Chain Management Programme**  
*(effective for students matriculated from year 2019 onwards)*

## 1. Introduction

WA is an experiential learning opportunity for students to enhance their employment readiness and employability through a supervised work placement with a Host Organisation (HO) in Singapore or overseas.

Students are encouraged to take on WA opportunities relevant to their study disciplines or alternative pathways to gain valuable real-life work experiences and build up their interdisciplinary skills and competencies. SUSS students may refer to the WA Guidelines in the Kinobi@SUSS.

Students may be assigned multidisciplinary tasks and cross-functional projects. Where appropriate, students may seek the approval from Head of CDO for any reasonable departure from their WA approved job.

## 2. Learning Outcomes

Students are encouraged to take on work assignments that build on their programme-based knowledge and skills and competencies from the SkillsFuture Framework ([SSG | Skills Framework \(skillsfuture.gov.sg\)](https://www.skillsfuture.gov.sg)).

Students are to note that the knowledge and skills learnt in the programme are useful in other industry sectors besides Logistics. See <https://www.skillsfuture.gov.sg/skills-framework#whicharethesectors>.

### (A) Programme-Specific Learning Outcomes

SCM students are strongly encouraged to carry out their WA in functional areas relevant to their enrolled field of study and they broadly, within the Logistics Industry Sector, include:

- i. Warehouse Management and Operations
- ii. Transportation Management and Operations
- iii. Freight Forwarding and Operations
- iv. Sales and Customer Service
- v. Logistics Solutioning and Programme Management
- vi. Logistics Process Improvement and Information System

**Work Attachment Learning Objectives  
for Supply Chain Management Programme**  
*(effective for students matriculated from year 2019 onwards)*

The following set of outcomes is aimed at providing students with the opportunity to observe and apply broad-based SCM skills and concepts in real work-related contexts.

- i. Identify relevant SCM concepts, philosophies, theories, and approaches that contribute to the operations of the organisation.
- ii. Demonstrate relevant SC competencies with regards to SC knowledge and practice.
- iii. Demonstrate awareness of the organisation's business, internal and external customers, stakeholders, and the business and operational linkages within the organisation.
- iv. Identify and describe roles of SC in delivering value and performance that contribute to the organization's business, vision and mission.
- v. Offer suggestions to help improve operations of the organisation that are feasible, practical and useful.
- vi. Produce a final report that covers personal learning and insights gleaned from key tasks' performance and related challenges during WA.

**(B) Generic Learning Outcomes**

The generic learning outcomes are aligned to the SkillsFuture Framework's critical core skills (CCS): [SSG | Critical Core Skills \(skillsfuture.gov.sg\)](https://www.skillsfuture.gov.sg).

Students are strongly encouraged to develop these CCS (16 competencies; grouped into 3 clusters) that are most relevant to their specific roles during WA. The CCS are transferable and they serve to enhance students' employability.
