

## Pre-Session Questions to ponder

### Session description

This session is a dialogue with and sharing of the reflections of a Service-Learning advocate's journey through the 3Ps: **People** (IHL and community youth development at the young adult years, university career services), **Public** (Statutory board Public policy execution and sector equipping), and **Private** (corporate social impact through CSR and Sustainability strategy, and a social-missioned enterprise).

### Reflection in Service-Learning – what then does it lead to?

- What – did your students experience throughout the time (years?) with you?
- SoWhat – did they learn that impacted them? (perspective, values, opinions, habit)
- NowWhat – have they done/ are they doing/ are they going to do about this realisation as they graduate into their careers?
