

SWK104e Human Growth and Life-Span Development (Birth to Adolescence)

Level: 1

Credit Units: 5 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY SEMESTER

E-Learning: BLENDED - Learning is done MAINLY online using interactive study materials in Canvas. Students receive guidance and support from online instructors via discussion forums and emails. This is supplemented with SOME face-to-face sessions. If the course has an exam component, this will be administered on-campus.

Synopsis:

This course covers the developmental changes, issues, and challenges in human development from birth to adolescence with special reference to the physical, cognitive, and socioemotional aspects of human growth and development. The life span perspective explored here is viewed as lifelong, multidimensional, plastic, multidisciplinary, and contextual. This perspective actively involves growth, maintenance, and regulation. The course will also examine contemporary concerns from birth through adolescence. Presented in depth and breadth, and supplemented with interactive, hands-on tutorial activities and online forums, this course will provide the students with a solid foundation in the knowledge of human growth and life span development as they prepare for a career in the helping profession.

The course also discusses developmental issues and social concerns related to the various stages of the life-span such as issues on parenting children and adolescents, child-abuse, juvenile, eating disorder etc., all of which have implications for a career in the helping profession.

Topics:

- What is life-span development?
- Theories of Development
- Physical growth and Cognitive Development in Infancy
- Socioemotional Development in Infancy
- Physical development in Early Childhood
- Cognitive development in Early Childhood
