

SWK501 Human Lifespan and Social Ecology

Level: 5

Credit Units: 5 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY SEMESTER

Synopsis:

Human Lifespan and Social Ecology provides the understanding of human growth and development through the lifecycle approach. Theories and knowledge of individuals, groups, organisations and other collectives across diverse client systems and fields of practice will be taught. Human development includes the various stages of life from infancy to late adulthood highlighting the issues and challenges in each stage. The lifespan perspective is multi-dimensional, multidisciplinary and contextual. The social political context and the role of the environment in relation to human development will be highlighted. The experiences of people from diverse cultures will expand our understanding of sustainable human development in a global context.

Topics:

- Introduction to life span development
- Infancy
- Early childhood
- Middle and late childhood
- Adolescence
- Early adulthood
- Middle adulthood
- Late adulthood

Learning Outcome:

- Examine human growth and development within a historical, cultural, and global context.
- Analyse the various phases, stages and tasks associated with the lifecycle of individuals and families.
- Evaluate biological, cultural, ethnic, psychological, spiritual, and sociological factors that influence the behaviors of individuals, families, communities, and cultures at various phases of life.
- Discuss theory and practice that demonstrates how to maintain a dual focus on both the individuals and their environmental conditions as well as understand the effect of systems and relationships on individual lives.
- Formulate an understanding of special populations and the systemic effects of prejudice and discrimination in a global context.
- Appraise what has been learned from the course to provide effective services for clients through the process of understanding, analysis, intervention and evaluation.

Assessment Strategies:

Continuous Assessment Component	Weightage (%)
TUTOR-MARKED ASSIGNMENT	50
Sub-Total	50

Examinable Component	Weightage (%)
Written Exam	50
Sub-Total	50

Weightage Total	100
